Summary

Full-stack Software Engineer with experience building scalable, production-grade web applications and data-driven systems. Skilled in backend development using Python (FastAPI, Flask) and C# (.NET) along with modern frontend frameworks (Angular, React), and cloud-native architectures on AWS and Azure. Experienced in designing data pipelines, microservices, and integrating LLM-powered systems. Multiple-time hackathon winner delivering high-impact, performance-driven solutions.

Skills

Languages: Python, C++, C#, SQL
Frontend: Angular, React, Next.js, Typescript, JavaScript
Backend: FastAPI, Flask, Django, C# (.NET Core), SQL (Postgres, T-SQL)
Cloud & DevOps: Docker, Kubernetes, AWS, Azure, Git, Nginx
Data & AI: LangChain, HuggingFace, Azure OpenAI, PowerBI
Databases: PostgreSQL, MongoDB, Firebase

Experience

Software Engineer | *Indiana University School of Medicine* | Indianapolis, IN, USA 01/2026 – Present

- Built HIPAA-compliant Python pipelines to extract phenotype and genotype data from over 6,450 patient EMRs, improving report discovery by 6x.
- Automated document classification and extraction workflows, achieving 60% performance gains.
- Collaborated with clinicians and engineers to validate the extraction logic and ensure regulatory compliance.

Software Engineer | *O'Neill School of Public Affairs and Environmental Affairs* | Indianapolis, IN, USA 07/2025 – 12/2025

- Engineered Indiana Toxicity Watch, a full-stack geospatial data visualization platform (Flask, PostgreSQL, and AWS) that aggregates, processes and maps environmental data across 90+ counties, enabling proactive public health policy decisions.
- Created interactive PowerBI dashboards with complex DAX reducing data analysis time by 80% for policy researchers.
- Built an LLM-powered chatbot using LangChain and Azure OpenAI to provide real-time, contextual insights on environmental toxicology data, improving researcher accessibility to complex datasets.

Software Engineering Intern | *Becton Dickinson* | Bengaluru, KA, India 01/2023 – 06/2023

- Built a microservices-based recommendation engine (Python, SQL), processing user behavior data and implementing collaborative filtering algorithms to personalize product suggestions and increase campaign conversion rates by 25%.
- Designed and implemented robust ETL to ingest and unify data from 5+ disparate sources, improving data consistency and availability for analytics by 99.5%.
- Implemented a "Next Best Action" decisioning engine within backend services, leveraging user session data to dynamically serve personalized content, resulting in a 20% uplift in user engagement**,** leading to increased sales.

Software Engineering Intern | *Becton Dickinson* | Bengaluru, KA, India 05/2022 – 07/2022

- Developed a secure, full-stack internal web portal using Angular and ASP.NET MVC featuring a dynamic SQL query builder that reduced report generation time by 30%.
- Implemented Role-Based Access Control (RBAC) across the stack to enforce granular permissions and secure sensitive enterprise data for multiple user roles.
- Contributed to an Agile team by developing features in Typescript and C#, participating in global sprint ceremonies, and collaborating via Azure DevOps to ensure timely feature delivery.

Projects

VocabCards – Personalized vocabulary learning platform | (Angular, ASP.NET Core Web API, SQL Server, Azure, Firebase)

- Engineered a gamified vocabulary platform, supporting spaced repetition, and leaderboards, driving 30% weekly user growth.
- Built scalable backend APIs integrated with Azure and Firebase for authentication and data persistence.

InnovAIte – AI-powered innovation portal | (LangChain, OpenAI API, Flask, Next.js, PowerBI) | **Sponsored by ServiceNow**

- Built a portal using the ReAct framework to evaluate and prioritize ideas by business impact, ROI, and strategic alignment.
- Automated idea scoring and ranking with PowerBI dashboards to track multiple evaluation metrics and improve decision making.

Education

Indiana University Bloomington Bloomington, IN, USA
Master of Science (M.S.) in Computer Science GPA: 3.9 / 4 | 08/2024 – 05/2026
Teaching Assistant for Computer Network and Biomedical DS in Practice

Vellore Institute of Technology Vellore, TN, India
Bachelor of Technology (B. Tech) in Computer Science GPA: 8.7 / 10 | 07/2019 – 05/2023
